BAD COLD? GET RELIEF AT ONCE WITHOUT QUININE

"Pape's Cold Compound" ends severe colds or grippe in few hours.

You can end grippe and break up a severe cold either in head, chest, body or limbs, by taking a dose of "Pape's Cold Compound" every two hours until three doses are taken.

It promptly opens clogged-up nostrils and air passages in the head, stops nasty discharge or nose running, relieves sick headache, dullness, feverishness, sore throat, sneezing, soreness and stiffness.

Don't stay stuffed-up. Quit blowing and snuffling. Ease your throbbing head—nothing else in the world gives such prompt relief as "Pape's Cold Compound," which costs only 25 cents at any drug store. It acts without assistance, tastes nice, and causes no inconvenience. Be sure you get the genuine.—Advt.

MISS DAVIS ASKS FOR \$7,212,000 TO IMPROVE PRISONS

Five New Buildings Needed, Commissioner of Correction Writes Mayor.

"Policemen's night-sticks and citizens' campaigns against the police won't teach young boys and girls how to make an honest, decent living," writes Commissioner of Correction Katherine B. Davis in a letter to be forwarded to Mayor Mitchell to-day, in which she asks for the immediate construction of a new workhouse for men on Riker's Island, a new industrial penitentiary on Hart's Island, a farm colony workhouse for women, a new and larger Tombs Prison and a Detention Home for Women in Brooklyn.

For general prison improvements Commissioner Davis asks that \$1,803,000 be spent this year and each year until 1919.

"Neither will policemen's night-sticks teach the desirability of getting a training which will make it possible for criminals to earn an hon-

est living," goes on the appeal of the Commissioner. "Again, the night-sticks will not reduce the standard of living of the young criminal or the rowdy to conform to his honest earning capacity. A round of short sentences to institutions which do not provide wholesome, useful, hard work under decent sanitary or custodial conditions will not teach the young criminal a trade, make him respect the law or furnish him honest work when he leaves prison."

The Commissioner adds that suspended sentences and paroles for old offenders, because they are found guilty of minor offenses or because there is no room in the city or State institutions for them, will not, in many cases, help change the habits of the unfortunate.

Continuing, the letter says: "The present administration's crusade against gangsters, gunmen, drug traffickers and addicts and loafers has been very effective in increasing the length of terms of sentences, the repeated rearrests of former inmates of correctional institutions and the consequent overcrowding of our city correctional institutions with a greatly increased number of hardened offenders, but unless our institutions can be equipped to properly deal with these inmates the result is bound to be unsatisfactory."

Millionaire Saved From Fire.
ST. LOUIS, Mo., Jan. 13.—The home of Jackson Johnson, millionaire President of the International Shoe Company in University City, a suburb, was destroyed by fire early to-day. Mr. Johnson, his wife, son and daughter were rescued by firemen when all means of egress were cut off by the flames. The damage is estimated at \$150,000.

BIGGEST SUBMARINE

Washington Gives Contract for Giant Under-Sea Fighter.

WASHINGTON, Jan. 13.—Contracts have been awarded by the Navy Department to the Electric Boat Company for a sea-going submarine to be built at Quincy, Mass., for \$1,500,000 and for three coast defense submarines to be built at Seattle, Wash., for \$450,000 each. Contracts also were closed with the Lake Torpedo Boat Company for four coast defense submarines, to be built at Bridgeport, Conn., \$427,000 each.

The big sea-going submarine will be of 1,100 tons displacement and will be twice as large as any submarine in a foreign navy, though some are now building in Europe of more than 800 tons. Certain features of American design will make this craft unlike any other yet built.

She will have a radius of action of about 2,000 miles, a surface speed of twenty knots and submerged speed of eleven knots. By using storage batteries alone she will be able to travel completely under water for more than a day. On her deck will be carried rapid-fire guns designed to be completely inclosed when the vessel dives. A valuable feature will be the retractable torpedo tubes, making it unnecessary to maneuver the ship to aim at an enemy, and adding enormously to the craft's offensive power.
